Government of Rajasthan  
Ground Water Department

No. F.12(3)GW/2011

Jaipur, Dated: 1.11.11

CIRCULAR

The Central Ground Water Authority, New Delhi, in its order No. 28-7/CGWA/2011-1302 dated 6.9.2011, a copy of which is enclosed, has directed that artificial recharging/ rain-water harvesting structures have to be constructed in Central & State Government buildings to augment ground-water and to recharge it, saving it from further depletion. The directions of the Authority are binding on the State Government under section 5 of the Environment (Protection) Act, 1986.

It is in this context enjoined upon all ACS's/Pr. Secretaries/ Secretaries and HoDs to prepare an action plan alongwith forecast estimates for the construction of rain-water harvesting/artificial recharge structures in all Government buildings under their jurisdiction. Proposals for allocation of funds for the purpose should thereafter be put up to the Finance & Plan Departments during the Plan BFC and works taken up looking to the availability of funds. In the Government buildings situated in rural areas, the activity is eligible for funding under MG NAREGA and, therefore, efforts should be made to get them included in the Annual Action Plan of MG NAREGA. Wherever possible, dovetailing of funds with the existing schemes should also be attempted.

The Authority has further stated that an annual report is to be submitted to the Central Ground Water Authority. The ACS/Pr. Secretaries/Secretaries concerned will therefore submit annual reports to the Ground Water Department in the Secretariat that, after their consolidation, will be sent to the Authority.

Encl. As above.

SUB: ADOPTING ARTIFICIAL RECHARGE TO GROUND WATER/RAIN WATER HARVESTING AND FOR PROMOTION OF OTHER GROUND WATER CONSERVATION MEASURES IN ALL THE GOVERNMENT BUILDINGS

Whereas, Central Ground Water Authority has been constituted under section 3(3) of Environment (Protection) Act, 1986 vide Notification S.O. 38 (E) dated 14.1.1997 for the purpose of regulating indiscriminate boring and withdrawal of ground water in the country and to issue necessary regulatory directions with a view to preserve and protect the ground water. The Authority has been conferred with the powers under Section 5 of the said Act for issuing directions to any person, officer or any Authority for closure, prohibition of any operation or process or stoppage or regulation of supply of electricity or water or any other services.

And whereas, the Authority in exercise of its power and performance of its functions under section 5 of the Environment (Protection) Act, 1986 (No. 29 of 1986) is empowered to issue directions in writing to any person, officer or any Authority and such person, officer or Authority shall be bound to comply with such directions.

And whereas, it has come to the notice of the Authority that depletion in ground water levels has been observed in major Cities/towns/urban areas due to exploitation of ground water more than natural replenishment.

And whereas, the Authority considers it necessary and expedient to take up artificial recharge to ground water/rainwater harvesting in the Central and State Government Buildings to augment ground water resources and to save it from further depletion.

Now therefore, the Authority in exercise of the power under section 5 of the Environment (Protection) Act, 1986 (No. 29 of 1986) read with clause (xiv) of sub-section (2) of section 3, hereby, issues the following direction, namely:-

Directions

1. The Chief Secretaries of the States and the Administrator of the respective Union Territories shall direct the respective departments to adopt Rain Water Harvesting/Artificial recharge on priority on all the Government buildings under their jurisdiction.
2. The Secretary, Ministry of Urban Development, Government of India shall direct the respective departments to adopt Rain Water Harvesting/Artificial
